Ren DING a1202524

a1202524 A---- B----- C----- D----- E---- F----- G---4- H-----

I test my code according to test procedure. The only case I did not pass is the G4, which is showing all routes on test4.map when calculate the shortest path.

I think it is because I use the Dijkstra algorithm (Depth first search) that I cannot record the multi-path. If using BST, it may solve this problem.
